

5

REASONS

TO ADOPT AN ADULT DOG

1

An immediate companion

You know exactly what kind of dog you're getting, without having to wait for them to grow up. A adult dog will be calmer and more understanding than a puppy and therefore will be able to spend more quality time with you doing what you enjoy.

2

Keep your house and shoes safe!

Adult dogs are often naturally house broken. They will view your home as their den, and won't want to get it dirty. They are also less likely to chew on or scratch shoes and furniture.

If you're looking for your first family pet, an adult dog will be easier to care for and bond with your family faster than a puppy.

3

A quiet night's sleep

A puppy needs attention constantly and will wake you up throughout the night, unless you're prepared to clean up a big mess in the morning. Adult dogs will sleep through the night.

4

Help children relax around dogs

Puppies are hard to control. They don't understand that their teeth and claws can hurt you, or that they might be playing too rough! Adult dogs are calmer and more patient, and often enjoy the attention of little kids!

5

Adult dogs truly know you are rescuing them

They are grateful to have a forever home and show their gratitude with devotion, love, and protection for the rest of their lives.
